### EFCE calls for nominations for the Carl Wagner Medal of Excellence in Electrochemical Engineering

The Carl Wagner Medal of Excellence in Electrochemical Engineering is awarded every three years by the Working Party on Electrochemical Engineering (WPEE) of the European Federation of Chemical Engineers (EFCE) to a European researcher under the age of 35 for outstanding contributions to research in applied electrochemistry or electrochemical engineering.

In 2020 the medal will be presented at the 12th European Symposium on Electrochemical Engineering – 12<sup>th</sup> ESEE, to be held in Leeuwarden, The Netherlands, on 14-18 June 2020, where the recipient of the medal will be invited to give a lecture. The award also comprises a cash award of EUR 1500, a certificate and a travel grant (not exceeding EUR 500) to attend the 12<sup>th</sup> ESEE.

Nominations for the medal, with supporting documentation (letter of support of the nomination by a senior electrochemist or electrochemical engineer, curriculum vitae, list of publications and other relevant activities) should be sent to [Claudia.Weidlich@dechema.de](mailto:Claudia.Weidlich@dechema.de) or [Karel.Bouzek@vscht.cz](mailto:Karel.Bouzek@vscht.cz)

Deadline for submission of nominations: **20 February 2020**

The Award is generously sponsored by Covestro.

Further information about the nomination procedure, eligibility, supporting documentation, and the online submission form can be obtained from the EFCE website at: <https://efce.info/Carl+Wagner+Medal>.

## About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

## About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering. See [www.efce.org](http://www.efce.org)

## About Covestro

Covestro is among the world's largest polymer companies with business activities focused on the manufacturing of high-tech polymer materials and the development of innovative solutions for products used in many areas of daily life. The main segments served are the automotive, construction, wood processing and furniture, and electrical and electronics industries. Other sectors include sports and leisure, cosmetics, health and the chemical industry itself. The focus is on innovative, sustainable solutions for the big challenges of our time – such as climate change, increasing scarcity of resources, growing mobility and urbanization. In the field of electrochemistry Covestro together with partners has developed energy saving Chlorine production technologies using Oxygen Depolarized Cathodes.
