### Call for nominations - EFCE Excellence Award in Fluid Separations 2022

The European Federation of Chemical Engineering (EFCE) is pleased to present the call for nominations for the **2022 EFCE Excellence Award in Fluid Separations**. This quadrennial award recognises a PhD thesis of a researcher or engineer which demonstrates an outstanding contribution to research and/or practice in fluid separations.

The award comprises a certificate, the sum of 1500 euros, a travel grant of up to 500 euros, and a fee waiver to attend the International Conference on Distillation & Absorption 2022 (DA 2022) to be held in Toulouse, France, on 18 to 21 September 2022, where the award will be presented.

Nominations may be submitted by any PhD supervisor at a PhD-awarding institution in an EFCE member country or by a member of an EFCE member society. The PhD thesis nominated must address a topic relevant to the field of **Fluid Separations**, such as distillation, absorption, extraction, membrane separation, chromatographic separation and similar, of any operating scale. Both theoretical and experimental work will be considered, as will work considering both chemical- and bio-separations. Only PhD theses published between 1 January 2018 and 31 December 2021 are eligible for nomination.

Closing date for nominations: **7 March 2022**

Further information about the nomination procedure, eligibility, supporting documentation, etc. can be obtained from the EFCE website at <http://www.efce.info/ExcellenceAwardFluidSeparations.html>.

The Excellence Award is generously sponsored by **Evonik Industries AG**.

## About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

## About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering. See [www.efce.org](http://www.efce.org)

## About Evonik Industries AG

Evonik is one of the world leaders in specialty chemicals. The company is active in more than 100 countries around the world and generated sales of €13.1 billion and an operating profit (adjusted EBITDA) of €2.15 billion in 2019. Evonik goes far beyond chemistry to create innovative, profitable and sustainable solutions for customers. More than 32,000 employees work together for a common purpose: We want to improve life, today and tomorrow. [www.evonik.de](http://www.evonik.de)
