### **EFCE call for nominations – Process Intensification**

For the fourth time, the European Federation of Chemical Engineering (EFCE) is pleased to announce the call for nominations for the **EFCE Excellence Award in Process Intensification**.

This biennial award recognises an outstanding PhD thesis in the field of process intensification. The award consists of a cash prize of EUR 1,500 and a certificate, and will be presented to the winner at a special session during the fifth European Process Intensification Conference (EPIC5).

The winner will be invited to give a presentation following the award ceremony. Any PhD thesis in the area of process intensification supervised at a university or PhD-awarding institution of an EFCE Member Country is eligible for nomination. The nominator is the supervisor of the PhD candidate. The candidate's thesis must have been defended between 16 December 2012 and 31 December 2014.

Previous award winners include Dr.-Ing. Carsten Buchaly (2009), Dr.Ir. Patrick W.A.M. Wenmakers (2011), and Dr. Ernesto Altman Restrepo (2013).

The deadline for submission of nominations is **May 1<sup>st</sup>, 2015**.

Further information about the nomination procedure, eligibility, and supporting documentation can be obtained at:

<http://www.efce.info/ExcellenceAwardProcessIntensification.html>

EPIC5 which will be held in Nice, France, on 27 September to 1 October 2015 in conjunction with tenth European Congress of Chemical Engineering (ECCE10) and the third European Congress of Chemical Engineering (ECAB3).

Ends

## **About chemical engineers**

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

## **About EFCE**

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
