EFCE calls for nominations for the Excellence Award in Chemical Reaction Engineering 2018

For the fourth time, the European Federation of Chemical Engineering (EFCE) is pleased to announce the call for nominations for its **Excellence Award in Chemical Reaction Engineering**.

Launched in 2009, this award has been instituted to recognise an outstanding PhD thesis in the field of chemical reaction engineering.

The award winner will receive a certificate, a cash prize of EUR 1,500, a travel grant of up to EUR 500 and fee waiver to attend the conference where the award ceremony will take place. The 2018 award will be presented at a special session of the 25th International Symposium on Chemical Reaction Engineering – *ISCRE 25*, which will be held in Florence, Italy, from 20 to 23 May 2018.

The successful candidate will be invited to give a presentation following the award ceremony.

Nominations may be submitted by any PhD supervisor at a university or PhD-awarding institution in an EFCE Member Country. The PhD thesis nominated must address a topic relevant to the field of chemical reaction engineering. PhD theses defended and published between 1 January 2015 and 30 September 2017 may be proposed for evaluation.

Deadline for nominations: **30 October 2017**.

Further information about the nomination procedure, eligibility, and supporting documentation can be obtained from the EFCE website:

About BP

BP is a global energy company with wide reach across the world's energy system. The energy we produce serves to power economic growth and lift people out of poverty. In the future, the way heat, light and mobility are delivered will change. We aim to anchor our business in these changing patterns of demand, rather than in the quest for supply. We have a real contribution to make the world's ambition of a low carbon future. We have operations in Europe, North and South America, Australasia, Asia and Africa, and employ around 75,000 people.

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
