Call for nominations - Industrial Innovations in Process Intensification 2017

For the second time, the European Federation of Chemical Engineering (EFCE) is pleased to announce the **2017 EFCE Process Intensification Award for Industrial Innovation** to be awarded for an outstanding industrial application in the field of process intensification.

The award will comprise of a dedicated plaque and certificate, and the successful candidate or team will be invited to make a presentation at a special session of the 6th European Process Intensification Conference (EPIC 6). EPIC6, which is jointly organised with IPIC1 and APSPIS3, will be held in Barcelona, Spain, on 1-5 October 2017 in conjunction with the 10th World Congress of Chemical Engineering (WCCE10).

Any employee or a team of employees of a company with operations in an EFCE Member Country is eligible for nomination.

The nominated industrial innovation must be either stage of pilot-scale or full-scale industrial operation and it must have been developed between 1 January 2015 and 31 December 2016.

The deadline for submission of nominations is **extended to Friday, 07 July 2017**.

For further information about the nomination procedure, eligibility, and supporting documentation, visit: http://www.efce.info/PI_Award_Industrial_Innovation.html

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
