### **EFCE calls for nominations for its first Excellence Award in Comminution and Classification**

The European Federation of Chemical Engineering (EFCE) and its Working Party on Comminution and Classification are pleased to announce the call for nominations for its first **Excellence Award in Comminution and Classification**. The Award has been instituted to recognise a PhD thesis or paper(s) of a researcher or engineer which demonstrate(s) an outstanding contribution to research and/or practice in the field.

The Award is generously sponsored by  
**NETZSCH Grinding & Dispersing**

The award consists of a certificate, a cash prize of 1,500 EUR, and a travel grant and fee waiver to attend the 17<sup>th</sup> European Symposium of Comminution & Classification (ESCC 2022) where the award will be presented. The Symposium will be held in Toulouse, France, on 27 to 29 June 2022.

Furthermore, the successful candidate will be invited to make a presentation at ESCC 2022.

Nominations may be submitted by any PhD supervisor at a PhD-awarding institution in an EFCE member country or by a member of an EFCE member society. The nominated PhD thesis or paper(s) must address a topic relevant to the field of Comminution and Classification. Only PhD theses or paper(s) published between October 2019 and April 2022 are eligible for nomination.

The closing date for nominations is **30 April 2022**.

Further information about the nomination procedure, eligibility, supporting documentation and the online submission can be obtained from the EFCE website at:  
[https://www.efce.info/ExcellenceAward\\_ComminutionClassification](https://www.efce.info/ExcellenceAward_ComminutionClassification) .

## About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

## About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering. See [www.efce.org](http://www.efce.org)

## About the sponsor

Netsch Grinding & Dispersing is the global leader in fine grinding and dispersing applications, in liquid as well as dry processes. Our innovative material processing solutions enable our customers to create exciting products for a sustainable world. The scope of our products ranges from laboratory machines for smallest amounts samples to machines with highest capacities in the market. We offer not only single units but also complete solutions from single process lines to turnkey plants. NETZSCH Grinding & Dispersing is the most passionate team, bringing the future state of the art to customers across all industries. To be as close as possible to our customers we have localized our production and we are running a total of eleven laboratories around the world. Our sales and service teams are covering all global industrial regions. Innovation is the key to our future, for this reason we are aware of the importance of continuous top quality development, so it was easy for NETZSCH to decide to support this excellence award with our sponsorship.
