Call for nominations - Industrial Innovation in Process Intensification 2025

The European Federation of Chemical Engineering (EFCE) and its Working Party on Process Intensification are pleased to announce the **2025 EFCE Process Intensification Award for Industrial Innovation** to be awarded for an outstanding industrial application in the field of process intensification.

The award comprises of a dedicated plaque and certificate, and the successful candidate or team will be invited to make a presentation at a special session during the 9th European Process Intensification Conference - EPIC 9, which will be held in Athens Greece, on 4-6 June 2025.

Any employee or a team of employees of a company with operations in an EFCE Member Country is eligible for nomination.

The nominated industrial innovation must be either stage of pilot-scale or full-scale industrial operation and it must have been implemented between 1 January 2023 and 31 December 2024.

The deadline for submission of nominations is **31 January 2025**.

For further information about the nomination procedure, eligibility, and supporting documentation, visit: https://www.efce.info/PI_Award_Industrial_Innovation.html

The Award is generously sponsored by the **European Process Intensification Centre – EUROPIC**.

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering. See www.efce.org

About the sponsor

EUROPIC is a unique, industry-driven platform set up by a coalition of leading European companies.

Our mission is to support members by structurally addressing the global trends and challenges facing the process/chemical industry. We do so by accelerating knowledge and technology transfer in the field of process intensification (PI). To support and integrate the entire value chain, EUROPIC actively connects science and business in innovative application-driven research. We create interfaces between academia, end users (manufacturers), engineering companies and technology providers.
