Call for nominations

EFCE Excellence Award in Mechanics of Particulate Solids 2025

The European Federation of Chemical Engineering (EFCE) is pleased to issue an invitation call for nominations for the **2025 Excellence Award in Mechanics of Particulate Solids**. Presented in 2013 for the first time, this triennial award aims to recognise a PhD thesis or associated paper(s) of a researcher or engineer, which demonstrate(s) an outstanding contribution to research and/or practice in Mechanics of Particulate Solids.

The award is generously sponsored by **Jenike & Johanson Inc.**

The award will be presented at the International Congress on Particle Technology—PARTEC 2025, which will be held in Nuremberg, Germany, from 23 to 25 September 2025. It consists of a certificate, a cash prize worth €1500, a travel grant, and free registration to the conference. The winner will be invited to give a presentation following the award ceremony.

Nominations may be submitted by any PhD supervisor at a PhD-awarding institution in an EFCE member country or by a member of an EFCE member society. The nominated PhD thesis or paper(s) must address a topic relevant to the field of Mechanics of Particulate Solids. Only PhD theses or paper(s) published between May 2022 and March 2025 are eligible for nomination.

Closing date for nominations: **1 April 2025**.

Further information about the nomination procedure, eligibility, and supporting documentation and the online submission form are available on the EFCE website at: <http://www.efce.info/ExcellenceAwardMPS.html>.

About the sponsor

Jenike & Johanson, Inc., is the world's leading company in powder and bulk solids handling, processing, and storage technology. Over the past nearly 60 years, we've tested over 13,000 unique powders and bulk solids and worked on more than 7,500 projects, giving our team the broadest real-world and in-depth experience in the industry to address a wide variety of bulk material handling and engineering needs.

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
