Call for nominations -

Excellence Award in Thermodynamics and Transport Properties 2027

The European Federation of Chemical Engineering (EFCE) and its Working Party on Thermodynamics and Transport Properties are pleased to announce the call for nominations for the **2027 EFCE Excellence Award in Thermodynamics and Transport Properties.** The Award recognises a PhD thesis and associated papers published in the preceding two-year period, which demonstrate an outstanding contribution to research and/or practice in thermodynamics and/or transport properties.

The award consists of a certificate, a cash prize and a grant to attend the **35th European Symposium on Applied Thermodynamics** – **ESAT 2027** which will be held in the village of Port Royal, France, on 9-12 May 2027 where the award will be presented. https://www.esat2027.com/

Nominations may be submitted by any PhD supervisor at a PhD-awarding institution in an EFCE Member Country or by a member of a national or regional member association of EFCE.
The nominated PhD thesis and publication(s) must address a topic relevant to the field of thermodynamics and/or transport properties. The thesis must have been completed and published and the PhD degree examined and awarded **between 1 January 2025 and 31 December 2026.**

Closing date for nominations: **1st February 2027**

Further information about the nomination procedure, selection of candidates, eligibility, and supporting documentation, can be obtained from the EFCE website at: https://efce.info/ExcellenceAwardTTP.html.

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
