Call for Nominations Excellence Award in Membrane Engineering 2015

The European Federation of Chemical Engineering (EFCE) is pleased to present the call for nominations for the **2015 EFCE Excellence Award in Membrane Engineering**.

Launched in 2009 by the EFCE Section on Membrane Engineering, this award has been established to recognise a PhD thesis or paper(s) of a young researcher which demonstrates the most outstanding contribution to research and/or practice in membrane engineering in the process industries.

The award comprises a certificate, a cash prize of EUR 1,500, and a travel grant of up to EUR 500 to attend the Euromembrane 2015 Conference, which will be held in Aachen, Germany, from 6 to 10 September 2015.

The award will be presented during a plenary session, where the winner will also be invited to present their research.

Nominations may be submitted by any PhD supervisor at a PhD-awarding institution in an EFCE Member Country or by an individual member of an EFCE Member Society.

The PhD thesis/paper(s) nominated must address a topic relevant to the field of membrane engineering. Only PhD theses or papers published between 1 January 2012 and 31 December 2014 are eligible for nomination. A nominated PhD thesis must have been completed and published and the PhD degree examined and awarded.

Closing date for nominations: **31 March 2015**

For further information about the nomination procedure, eligibility and supporting documentation, please refer to the EFCE website:

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
