Call for nominations - Industrial Innovations in Process Intensification

The European Federation of Chemical Engineering (EFCE) is pleased to announce the first **EFCE Process Intensification Award for Industrial Innovation** to be awarded for an outstanding industrial application in the field of process intensification.

The award will comprise of a dedicated sculpture, travel grant (not exceeding EUR 500) and fee waiver to attend the fifth European Process Intensification Conference (EPIC 5), in Nice, France, on 27 September to 1 October 2015 where the award will be presented.

Any employee or a team of employees of a company with operations in an EFCE Member Country is eligible for nomination.

The nominated industrial innovation must be either stage of pilot-scale or full-scale industrial operation and it must have been developed between 1 January 2013 and 31 December 2014.

The successful candidate or team will be invited to make a presentation at a special session of the EPIC5 conference.

The deadline for submission of nominations is **May 1st, 2015**.

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
