EFCE calls for nominations in the field of Crystallization

The European Federation of Chemical Engineering (EFCE) is pleased to announce the call for nominations for the **2017 EFCE Excellence Award in Crystallization**. Launched in 2007, this triennial award has been instituted to recognise a PhD thesis or paper(s) of a scientist in an early stage of his/her career, who has made excellent contributions to the understanding or the industrial application of crystallization. The previous award winners are Dr. Pedro Miguel da Silva Martins, Portugal (2008), Dr. Levente L. Simon, Romania (2011) and Dr. Thomas Vetter, Switzerland (2014).

The award consists of a cash prize of 1500 euros, and a travel grant not exceeding 500 euros to attend the 20th International Symposium on Industrial Crystallization (ISIC 20) to be held in Dublin, Ireland, from 3 to 6 September 2017, where the award will be presented during a dedicated session. Here, the award winner will be given the opportunity to present the work.

Nominations may be submitted by any PhD supervisor at a PhD-awarding institution in an EFCE member country or by a member of an EFCE member society. The PhD thesis/paper(s) nominated must address a topic relevant to the field of crystallization. Only PhD theses or papers published between 1 January 2014 and 31 December 2016 are eligible for nomination. A nominated PhD thesis must have been completed and published and the PhD degree examined and awarded.

Closing date for nominations: **17 April 2017**

For further information about the nomination procedure, eligibility, supporting documentation, etc., and the submission of nominations please visit the EFCE website at <http://www.efce.info/ExcellenceAwardCrystallization.html>)

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
