EFCE calls for nominations in the field of Mixing

The European Federation of Chemical Engineering (EFCE) and its Working Party on Mixing are pleased to present the calls for nominations for the **2018 Young Researcher Award in Mixing**.

The Young Researcher Award was established in 2000 to recognise the work of a young researcher in his/her early career, which demonstrates an outstanding contribution to research and/or practice in mixing.

Previous Award winners are Giorgio Micale, Italy (2000), Joëlle Aubin, France (2003), Giuseppina Montante, Italy (2006), Andrea Ducci, UK (2009), Sebastian Maaß, Germany (2012), and Claudio Antonio Pereira da Fonte, Portugal (2015).

The award consists of a certificate, a cash prize of 1,500 euros, and an invitation to attend the 16th European Conference on Mixing in Toulouse, France, on 9-12 September 2018, where the Award will be presented.

Any young researcher (less than 35 years old) who has completed his/her PhD in the field of mixing at a European university and is currently active in the mixing research is eligible for nomination.

Closing date for nominations: **Friday, 20 March 2018**

For further information about the nomination procedure, eligibility, supporting documentation, etc., please refer to the EFCE website at

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
