

EFCE

E - Newsletter

Issue 1/2019, January 2019

<http://www.efce.info>

Dear members of EFCE,

Welcome to a special issue of the EFCE Newsletter the first one in 2019 dedicated to two EFCE events: the 2nd European Forum on New Technologies and the upcoming ECCE12/ECAB5.

INVITATION

Purpose of the Meeting: Digitalisation has the potential to change the way we work in Chemical Engineering. In particular it is likely to change the way the process industries work with the potential of big data and its analysis making the operations and the supply chain much more responsive. It could also significantly change the innovation process in developing new products and processes. What are the potential effects on sustainability, quality, safety, predictive capability and of course profitability?

What are the challenges and opportunities, and how can the EFCE and its Working Parties and Sections work together to address them? How can we engage the European Chemical Engineering community, both academic and industrial?

The meeting will bring together some visionary speakers to set out the potential and the challenges. There will be the opportunity to discuss how to tackle these challenges, through discussion and through collaboration and application to funded programmes.

Topics:

- *Vision for Digitalisation in the Process Industry*
- *The potential of Digitalisation*
- *The role of Digitalisation across the life cycle: in R&D, Design, and Operations*
- *Round table discussions and potential outcomes include proposals, challenges, workshop ideas*

[Download the preliminary programme here](#)

Venue: DECHEMA, Theodor-Heuss-Allee 25, 60486 Frankfurt am Main, Germany
Registration fee: 190 Euros (including business lunch and coffee break)

Register NOW!

REMINDER: ECCE12 & ECAB5 Call for Abstracts

AIDIC is pleased to announce again the ECCE12 & ECAB5 Call for Abstracts.

The abstract submission is still open for your contribution!

The deadline is extended to **28 February 2019**.

AIDIC is pleased to invite you to participate to this year major events **ECCE12 and ECAB5** to be held in the beautiful city of **Florence, Italy, from 15 to 19 of September 2019**, organized by AIDIC under the auspices of EFCE and ESBES.

Under the theme "*Bridging Science with Technology: a Renaissance in Science*", the **Scientific Program** will bring innovative solutions to respond to major challenges of our society. Plenary, Keynote, Invited and Contributed lectures will bring you up to date in all topics of modern Chemical and Biochemical Engineering to address Solutions to Global Challenges. **Please visit the congress website for the detailed list of topics.**

Exhibition & Sponsorship Opportunities:

AIDIC invites companies to participate as a Sponsor and/or exhibitor ECCE12/ECAB5. The European Congress in 2019 will see Italy as the host country, presenting an opportunity for the European and Italian industry to showcase the very best of its innovation and enterprises. The Congress will provide a unique opportunity for your company to present its role in the industry and for your staff

to meet with researchers and specialists in diverse areas of chemical engineering and biotechnology and to improve your views on innovative processes that will be vital for the industry of tomorrow. **For further information and the Sponsorship Registration Form, please visit the Congress website.**

The Registration Form contains a brief but complete description of the diverse sponsorship and exhibition opportunities we offer that meet any requirement and budget, with platinum, gold, silver, bronze and exhibitor packages. Specific request can be addressed to the dedicated e-mail address: sponsorship@aidic.it.

For general information or assistance you may contact this Secretariat:

ecce12_ecab5@aidic.it

Website: <http://www.ecce12-ecab5.org/>

We look forward to meeting you at these occasions!
