### **Call for nominations - Industrial Innovation in Process Intensification 2021**

The European Federation of Chemical Engineering (EFCE) and its Working Party on Process Intensification are pleased to announce the **2021 EFCE Process Intensification Award for Industrial Innovation** to be awarded for an outstanding industrial application in the field of process intensification.

The award comprises of a dedicated plaque and certificate, and the successful candidate or team will be invited to make a presentation at a special session during the 13th European Congress of Chemical Engineering – ECCE13, which will be held in Berlin, Germany, on 19-23 September 2021.

Any employee or a team of employees of a company with operations in an EFCE Member Country is eligible for nomination.

The nominated industrial innovation must be either stage of pilot-scale or full-scale industrial operation and it must have been implemented between 1 January 2019 and 31 December 2020.

The deadline for submission of nominations is **15 March 2021**.

For further information about the nomination procedure, eligibility, and supporting documentation, visit: [https://www.efce.info/PI\\_Award\\_Industrial\\_Innovation.html](https://www.efce.info/PI_Award_Industrial_Innovation.html)

The Award is generously sponsored by the **European Process Intensification Centre – Europic**.

## About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

## About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering. See [www.efce.org](http://www.efce.org)

## About the sponsor

Europic's mission is to support its members by structurally addressing the global trends and challenges facing the chemical industry by accelerating technology transfer and applications in the field of process Intensification (PI). Europic's products and services become structurally and directly coupled to global challenges in particular: sustainability, digitalization, new advanced materials and modularization. It is a unique industry-driven platform, initiated in 2009 by nine leading European companies. See <https://europic-centre.eu/>
