2025 EFCE Student Mobility Award announced

The European Federation of Chemical Engineering (EFCE) is pleased to announce its prestigious **Student Mobility Award**.

The objective of the award is to promote mobility among European chemical engineering students. The award is presented every two years to the best European students of chemical engineering who have spent one or more semesters studying abroad.

The EFCE Student Mobility Award 2025 will consist of three prizes:
1st Prize: EUR 2,000; 2nd Prize: EUR 1,500; 3rd Prize: EUR 1,000.

The prizes will be awarded during the 15th European Congress of Chemical Engineering (ECCE15), held in conjunction with the 8th European Congress of Applied Biotechnology (ECAB8) in Lisbon, Portugal, from 8 to 10 September 2025. The Student Mobility Award also includes an invitation to the Congress and a travel grant of up to EUR 500.

The 2025 EFCE Student Mobility Award is generously sponsored by BONDALTI.

BONDALTI

TOMORROW MATTERS®

All students who are citizens of a European country in which EFCE is represented can apply for the EFCE Student Mobility Award if they have successfully studied for at least one semester (≥ 30 ECTU) in first or second cycle (e.g. bachelor, master) study programmes in chemical engineering in each of two or more different countries. All documents should be submitted in *English* no later than 2 years after graduation.

Deadline for submission of applications: **1 March 2025**.

For details on the application procedure, supporting documentation and download of the application form, please visit the EFCE website at:

About BONDALTI

Bondalti is committed to contributing to a better world by creating innovative and sustainable chemistry, in which the energy transition plays an important role in its growth strategy. Bondalti is in the Top 1% of the most sustainable companies in the sector worldwide, according to the EcoVadis global ranking.

Bondalti is the largest Portuguese company in the field of industrial chemistry, the largest Iberian producer of Chlorine, the European leader in Aniline sales and the export engine of the Iberian industry throughout the world. Bondalti also operates in the water treatment and recycling sector.

It has industrial facilities in Estarreja and Sintra (Portugal), Cantabria and La Rioja (Spain), logistics facilities in Aveiro, Barreiro (Portugal) and Vigo (Spain), operations in Luanda (Angola), and offices in Lisboa (Headquarters, Portugal), Barcelona, Madrid, Pontevedra and Logroño (Spain).

Bondalti employs around 750 people and in 2023 had a turnover volume of more than 500 million euros. See <https://www.bondalti.com/>

About chemical engineers

Chemical, biochemical and process engineering is the application of science, maths and economics to the process of turning raw materials into everyday products. Professional chemical engineers design, construct and manage process operations all over the world. Oil and gas, pharmaceuticals, food and drink, synthetic fibres and clean drinking water are just some of the products where chemical engineering plays a central role.

About EFCE

Founded in 1953, The European Federation of Chemical Engineering (EFCE) is a non-profit-making association, whose object is to promote co-operation in Europe between non-profit-making professional scientific and technical societies in 30 countries for the general advancement of chemical engineering and as a means of furthering the development of chemical engineering.
